International Airport

Video captures opening ceremony of Runway 12/30

The Gary/Chicago International Airport recently marked the opening of its newly extended 8,900 foot main runway. The celebration on July 10, 2015 was the culmination of a multi-layered and complex infrastructure project and the support of several local, state, and federal stakeholders. As a result, the airport now has new, renewed opportunities for a variety of air services and development.

Enjoy this recap video from the event and watch Gary commission its new runway in style: https://vimeo.com/136763735
